

Product and UX audit

Product assessment

IstaSeva presents a three-sided Indian marketplace for stays, local services and transport, with booking/payment, provider operations and AI assistance. The customer proposition is visible on staging and the card/detail hierarchy is coherent. The current application behaves as a mixture of production implementation and demo: public discovery is real, but mobile OTP and support are simulated, KYC auto-approves, supply is sparse, and critical trust/legal journeys are absent.

Independent persona review concluded 32/100; runtime and cross-domain evidence lowers launch UX confidence further.

Persona outcomes

Persona	Evidence-based outcome
First-time Indian user	Clear categories; mobile auth/language defects can prevent trustworthy activation.
Non-technical user	Familiar cards/prices help; "Discovery/booming" language, multiple roles and fake support confuse.
Power user	Filters, saved items and detail views are promising; keyboard semantics and web/mobile drift hurt efficiency.
Low-bandwidth user	Lighthouse performance 34, FCP 12.5 s, LCP 15.7 s, 10,036 KiB transfer.
Budget Android	360 px viewport has horizontal overflow; large JS, blur/animation and image decoding are risks.
iPhone	AASA is absent (403); bundle identity/domain mismatch blocks reliable universal links.
Poor eyesight	Strong primary hierarchy; small secondary text, light-only mobile and untested dynamic type/zoom.
Screen-reader/keyboard	Homepage automated score is 96, but auth labels, popovers and native controls fail semantic review.
Limited English	Seven locale catalogs are a strength; mobile selection does not update language and HTML remains lang=en.
Privacy-conscious	No usable privacy/terms/deletion/export; discarded phone collection and tracked secrets destroy trust.
Frustrated/recovery	Contact/live chat are simulated; mobile Help does nothing; verification can block Contact.
Cancellation/deletion	Mobile previews refunds; web does not; deletion/export absent.

Staging and performance evidence

- * Homepage returned 200 with 4 stay, 3 service and 3 transport listings in the independent review.
- * Browser inspection found valid landmark/navigation/headings and image alts on the homepage.
- * At 360 x 640, document width exceeded the viewport and a horizontal scrollbar was visible.
- * Lighthouse mobile: performance 34, accessibility 96, best practices 100, SEO 100; FCP 12.5 s, LCP 15.7 s, TBT 360 ms, CLS 0.262, transfer 10,036 KiB.
- * Local staging build: JS 6,114 KB (1,533 KB gzip), CSS 245 KB (38.7 KB gzip); Vite warned above 500 KB.
- * Automated accessibility does not cover modal keyboard behavior, screen readers, auth pages or native apps.

Findings

ID	Domain	Title	Severity	Confidence	Evidence	User/business impact	Recommended correction	Effort	Owner	Release blocker	Status
PUX-001	Mobile/AUTH	Hard-coded OTP completes demo flow	Critical	Confirmed	OnboardingScreen.tsx:148-157,307-395	False verification/session	Real phone auth or disable	High	Mobile/AUTH	yes	Open
PUX-002	Mobile/AUTH	Signup discards collected phone and skips verification	High	Confirmed	onboarding.doSignup	Misleading PII collection	Redesign/persist minimal verified identity	Medium	Product/Mobile	yes	Open
PUX-003	i18n	Mobile language selection is disconnected	High	Confirmed	local state only	Non-English abandonment	Bind/persist LanguageContext	Low	Mobile	yes	Open
PUX-004	Support	Contact and live chat simulate success	High	Confirmed	Contact.tsx setTimeout/canonical replies	Lost complaints/safety/refunds	Real ticketing or truthful disablement	Medium	Support/Backend	yes	Open
PUX-005	Trust	Privacy/Terms links are #; no routes	High	Confirmed	Footer/App routes	No informed contract/notice	Publish versioned documents	Medium	Legal/Product	yes	Open
PUX-006	Privacy	No deletion/export journey	High	Confirmed	users routes/mobile Privacy	Rights/app-store failure	End-to-end request workflows	High	Privacy/Backend	yes	Open
PUX-007	Refund	Web cancels without exact refund preview	High	Confirmed	GuestDashboard vs mobile flow	Disputes/chargebacks	Use server preview on web	Low	Payments/Web	yes	Open
PUX-008	Accessibility	Auth labels and icon buttons lack associations/names	High	Confirmed	Login/Signup source	Excludes assistive users	Semantic labels, names, errors	Low	Web/A11y	yes	Open
PUX-009	Accessibility	Custom popovers/dialogs lack full keyboard/ARIA patterns	High	Confirmed	MarketplaceControls	Trapped/unclear navigation	Use tested accessible primitives	Medium	Design system	yes	Open
PUX-010	Mobile/A11y	Core RN controls lack accessibility props	High	High confidence	Pressable audit	TalkBack/VoiceOver failure	Native semantic/device tests	High	Mobile	yes	Open
PUX-011	Performance	Initial payload is unsuitable for low-bandwidth users	High	Confirmed	Lighthouse/build	Abandonment/data cost	Route split, defer, budgets	Medium	Frontend	yes	Open
PUX-012	Mobile/Release	App identity/artwork/links/EAS incomplete	High	Confirmed	app config; AASA/assetlinks 403	Store/link failure	Canonical config and associations	Medium	Release	yes	Open
PUX-013	Media	Images rarely lazy/responsive	Medium	Confirmed	marketplace image markup	Data/memory/LCP cost	variants, srcset, dimensions, lazy	Medium	Frontend	no	Open

ID	Domain	Title	Severity	Confidence	Evidence	User/business impact	Recommended correction	Effort	Owner	Release blocker	Status
PUX-014	Analytics	No full success/retention/support/deletion event contract	Medium	Confirmed	clients/event names	Cannot manage funnel	Versioned server-correlated taxonomy	Medium	Product data	before paid growth	Open

Required analytics

Server-correlate onboarding/verification steps, search/zero results, availability, checkout start/abandon, payment success/failure/cancel, booking completion, cancellation preview/completion/refund completion, support submitted/resolved, deletion/export requested/completed and D1/D7/D30 activity. Exclude PII; include platform/app version/locale/network/error/correlation IDs.
